

Dear Third Grade Families,

It is hard to believe we are already one third of the way through the school year! I am excited to note that math homework seems to be going well. We began our unit on multiplication last week and I was so pleased to see students using their multiples to help them figure out a problem. In addition to the 5 minutes of fact fluency every night, I would like to begin to send home some additional math homework that should take no more than 20 minutes to complete. At the beginning of every month (starting the Friday after Thanksgiving) I will be sending home a math homework choice menu. There will be 9 options on this menu and I am asking that you and your child choose 1 per week to complete. Completed choices can be sent in on Fridays in order to stay consistent with our Friday homework routines. The math choices provided are designed to allow student creativity and choice in how they learn. I have attached a sample menu to this letter (the format each month will be similar to this). If you have any questions please feel free to call at 826-3694, email [mshannon@sau60.org](mailto:mshannon@sau60.org), or message through Class Dojo. Thank you for your ongoing support it has been such a pleasure working with you and your student this year!

Sincerely,  
Ms. Shannon
